

Thank You for Trying These

Scrapbook Graphics from ScrapbookScrapbook.com

If by chance you see fine black lines on the graphics DO NOT WORRY THEY WILL NOT PRINT. It is simply a compatibility problem for some video monitor's drivers. You can make them go away by changing the view to larger or smaller under 'View'.

You will be inspired to use these unique graphics in many different combinations. You can print the Background sheets at a small size percentage to use them for frames or print the frames small to use for journaling boxes.

You can print each page as many times as you need, in any size you need.

To get the largest prints, change the size in the print dialog box from "fit to page" to "100%". Choose a smaller size when you want to print them small.

Be sure to use your printer's "High Quality" setting.

Be sure to specify which page or pages to print or the whole set will print by default. To print page 2, enter: "Print page 2 to 2."

For best results print on heavy weight paper like cover, index or card stock.

To really save on printing costs, refill your own Inkjet cartridges. The office supply stores now sell refill kits but you can save much more by getting a kit from Mister Ink Jet at www.misterinkjet.com. Just be sure to refill before you run completely out of ink and to remove any cellophane tape you might put on while filling before you replace the cartridge in your printer.

This Quickie page has designs from the Valentine Scrapbook Graphics Set. You can use it as is or cut it up to use with the other pages in that kit.

Happy Scrappin
